A Note from the Editor

This issue features two interesting articles on pedagogy with emphasis on a student engagement technique and how we develop the support structures our students need to enhance their learning. Dr. Pam Harris shares her insights from an activity where students create their own video tutorials while Dr. Brian Winkel challenges us to question what types of ‘walls’ we build for our students.

As always, we continue to welcome general topic papers you wish to submit. The Editorial Policy is posted on our website. November 1, 2013 is the deadline for submissions for the Fall issue. We look forward to hearing from you!
